EDUCATION

2024 - Present
INSTITUTE OF ADVANCED
RESEARCH (IAR) UNIVERSITY
• B.Tech- Computer Engineering
with Specialization in
Cybersecurity

2021 - 2024
VPMP POLYTECHNIC
• Diploma in Computer
Engineering

TECHNICAL SKILLS

- Cybersecurity: Threat Intelligence, Network Security, Honeypots
- Security Tools: Cowrie, Wireshark, Nmap, Burp Suite
- Programming: Python, Bash
- Networking: TCP/IP, DNS, HTTP/HTTPS, Network Analysis
- System: Linux, Windows

LANGUAGES

- Gujarati (Native)
- English (Intermediate)
- Hindi (Fluent)

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Engineering student specializing in Cybersecurity with hands-on exposure to threat intelligence, network security, Linux, Python, and security monitoring. Experienced in developing cybersecurity projects and practicing security concepts through hands-on labs. Seeking a 6-month cybersecurity internship to apply practical security skills in a professional environment.

PROJECTS

Centralized Threat Intelligence & Automated Response Framework

AUG-2026 - PRESENT

- Designed a centralized security architecture using Cowrie honeypots and web deception services to capture and analyze malicious activity.
- Developed Python/FastAPI REST APIs for collecting, processing, and distributing threat intelligence across monitored systems.
- Implemented automated malicious-IP response using nftables to block identified indicators.
- Built a PostgreSQL-based threat intelligence repository with JSON-based security event and indicator exchange.
- Containerized project services using Docker and Docker Compose and deployed the environment on Ubuntu Server.
- Integrated custom dashboarding for visualization of security events and threat intelligence.

Network Packet Analyzer | Python

- Developed a Python-based packet analysis tool for capturing and inspecting network traffic.
- Applied networking concepts to analyze packet-level information and understand network communication.

Security Log Analyzer | Python

- Developed a Python-based tool to parse and analyze security logs.
- Applied log-analysis techniques to identify relevant security events and support basic threat investigation.

CERTIFICATIONS & TRAINING

TryHackMe - Cybersecurity Hands-on Labs

- Practical training in network security, Linux, reconnaissance, web security, and security fundamentals.
